

About Sketch Flexible Stone Veneers

Sketch Australia flexible stone veneers are chemically extracted from 100% natural stone blocks. Sustainably extracted with minimum carbon footprint, they are lightweight, durable, flexible, water & heat resistant, and the installation process is easy fast and economical.

Cleaning and Maintaining Sketch Stone Veneers

After installing and sealing your Sketch Stone Veneer, to help you keep always looking in a clean and pristine condition for many years, we recommend the below Sealers Plus products to help with your weekly, monthly and quarterly clean. The products not only clean and maintain your Sketch Stone Veneer but they also do not affect the stone or the sealer. They also disinfect the surface which kills germs like E-Coli and S-Aureus plus also helps prevent mould, mildew and germ growth. These products are Professional Grade and easy to use.

These recommendations are intended as general guidelines for sealing and maintenance. Read product label, technical bulletin and SDS thoroughly prior to using any product. Always test first. Keep floors dry to prevent slip falls.

About Sketch Flexible Stone Veneers

Sketch Australia flexible stone veneers are chemically extracted from 100% natural stone blocks. Sustainably extracted with minimum carbon footprint, they are lightweight, durable, flexible, water & heat resistant, and the installation process is easy fast and economical.

Installing and Sealing Sketch Stone Veneers

Pre-sealing **Sketch Stone Veneers** is recommended before installation to help minimise staining from the adhesive and grout during the installation. It will also help with the grouting clean up process. We recommend **one** coat of the either **Aqua-Seal Gold+®** or **Enhance'N'Seal** depending on what will be your final sealer and desired look, a minimum of 24 hours before installation. Then after installing and grouting, use **Haze Away** in the final grouting clean up wash to safely clean up grout and help prevent any grout haze residue. When the installation is finished (pre-sealed, grouted, washed) then when the surface is dry and grout has cured, apply one more coat of your selected sealer to finish off the installation.

GROUT HAZE PREVENTION AND CLEAN UP

Non acidic problem solver formulated to simplify the grout clean up process by helping to prevent grout haze from cement based, latex modified and epoxy grout. Helps prevent latex film and grout haze from forming on stone, terrazzo, encaustic and tile surfaces. Can be used to remove existing light grout haze and latex film within 10 days of grouting.

PRODUCT	PACKAGING	MORE INFO	BENEFITS
HAZE AWAY			<ul style="list-style-type: none"> • Pre-seal stone surface, then grout as usual; • Use Haze Away in the final grout clean up process; • Helps prevent grout haze and grout staining; • Ideal for cement based, latex modified or epoxy grout

SEALING OPTIONS

Natural Look

NATURAL LOOK - PREMIUM STAIN PROTECTION

Best recommendation for a natural look and maximum stain resistance against oil, food, grease and grime. Ideal for residential, commercial, high traffic and also for food areas. Will also seal surrounding grout. Below surface, penetrating type, non-coating sealer. Can also be used to pre-seal before installation.

PRODUCT	PACKAGING	MORE INFO	COATS	COVERAGE	BENEFITS
AQUA-SEAL GOLD+®			2	10 - 15m ²	<ul style="list-style-type: none"> • NANOPLUS for Deep Protection - Low VOC < 5gm/L • RAPIDISEAL for Fast Cure - Helps Consolidate Stone • Non Yellowing - UV Resistant - Non Flammable • MAXIMUM Stain Resistance Against Oil, Food & Grime

Colour Enhanced Look

COLOUR ENHANCED LOOK - PREMIUM STAIN PROTECTION

Best recommendation for a colour enhanced/darkened look and when maximum stain resistance is required. Ideal for residential, commercial, high traffic and also for food areas. Will also seal and colour enhance porous grout. Can also be used as a pre-sealer before installation. Below surface, penetrating type, non-coating sealer. GENERAL NOTE: These recommendations are intended as general guidelines for all available sealing options. Read product label, technical bulletin and SDS thoroughly prior to use. Always test first to determine number of coats and desired look. All coverages and suggested number of coats are approximate and only as a guide. Coverage will vary depending on surface density, porosity, texture and absorption. Also weather conditions, the application method and number of coats required. Sealers are not waterproofing agents and do not protect against etching by acid based contaminants or harsh chemicals. COVERAGE NOTE - Approximate per 1 litre per coat.
